

Environmental Policy Statement

Nitec (UK) Ltd has committed to recognising, reducing & preventing any environmental impacts directly related to the business, both locally & globally where reasonably practicable within the context of the organization.

Nitec is committed to protect the environment, including prevention of pollution from our processing and storage. Nitec has committed to reduce the use of non-renewable resources and purchases energy from suppliers with this ethos.

Nitec has a legal responsibility to comply with regulatory and statutory requirements and will facilitate these requirements by training and resources wherever necessary this is achieved through the Company's Environment Management Policy which is fully integrated with ISO14001.

Progress towards the Company's objectives is achieved through continued planning, monitoring, reviewing and improvement of the significant environmental aspects and impacts, from which are developed programmes to reduce risk from these impacts.

Implementation of the Policy is achieved through communication to employees and involvement and training of employees, in the aims, objectives & rationale of the environmental management system.

As an initial commitment to communication, this policy is displayed in key areas of the site and is posted on the Company's website – www.electroless-nickel-plating.co.uk

Signed

David Brown, Managing Director

For and on behalf of Nitec (UK) Ltd
